Sharing what God is doing in this ministry.

What a great summer seeing so many of you! We drove around five thousand miles, spoke in six states, and were able to tell thousands about what God is doing through many of you in our ministry at Moody Aviation. Our last deputation we knew that we were called to serve at Moody Aviation--but not exactly sure how. This trip, we were able to clearly show how God is using us to be a part of His ministry. This was Sydney's and possibly Blake's last deputation trip with us so it was a special time as a family. God blessed us with the opportunity to rekindle relationships and update many of you on what has been happening over the last three to five years. We also spent time with family, many of whom we only see every three years on deputation.

5th-Year Students

ministry.

The past spring term at Moody was a busy season. Travis worked up until the day we left in June, and finished grades and duties while on deputation to close out the school year and prepare for a new one as classes began again in July.

It was great to receive the new students into the Maintenance Specialists program last spring, and to grow them not only in their mechanical skills, but in the many soft skills they will utilize while on the field. This is one of the most stretching terms for the students in their fourth of five years of schooling. They have a lot of responsibility placed on them. Though it is difficult, we see so much growth as they start to feel what it is like to work in a shop and not a school.

We celebrated the maintenance specialist graduate this year with a party at our house including all the instructors and students. It's always a memorable event and allows us to pour into the students in a special way. This latest graduate and his family have joined JAARS Aviation and will be overseas soon. Pray for them as they are prepare.

Sydney working on a cake

Sydney at Graduation

family.

Sydney graduated high school this year and she also finished her training as a baker at the local community college. She received a certificate for the baking industry and plans on entering the work force to start her career in baking. She has grown her skills exponentially and made numerous cakes, pies, and dozens and dozens of cookies. One of her larger projects was even a wedding cake! We are proud of her and look forward to how God will use her through this skill. Travis's students and colleagues are always eager to be taste-testers, and many others have volunteered--because who doesn't love yummy treats?! **Blake** started high school this year and is excited to take engineering classes and band as some of his favorite courses. **Bryce** continues living on his own and learning how to navigate life as an adult.

praise

Great trip this summer • The ability to meet with so many of you! • Sydney completing high school and college • God continually meeting all our needs

prayer

Blake as he starts high school • God will surround our kids with friends that will draw them to Christ • Sydney as she starts in the work force and finding a job that fits her • Travis and our family as we work with Proclaim people raising support to pursue missions • Travis as he daily interacts with his students and teaches them inside and outside of school • Our family would be a light to those we encounter

Travis & Heather, Bryce, Sydney, and Blake
